- **Time: 3 hours.**
- Part A (Questions 1–10): Each question is worth 4 marks. Each question may have multiple correct answers. **Enter your answers to these questions into the computer as instructed.** Every question is worth 4 marks. A solution will receive credit if and only if all the correct answers are chosen, and no incorrect answer is chosen. There will be a cut-off for Part A, which will not be more than 20 marks. Your solutions to the questions in Part B will be marked only if your score in Part A places you over the cut-off. (In particular, if your score in Part A is at least 20 then your solutions to the questions in Part B will be marked.) However, the scores in both the sections will be taken into account while making the final decision.
- Part B (Questions 11–20\*): Each question is worth 10 marks. You should **answer 6 questions** from these. In order to qualify for the PhD Mathematics interview, you must obtain at least 15 marks from among the starred questions 17\*–20\*. **Indicate the six questions to be marked in the boxes below this paragraph. Write your solutions to Part B in the page assigned to each question.**
