

Information about CMI entrance exam for BS (Honours)

The BS entrance exam will continue to have the same general pattern as in previous years. Note the following specific points.

- Part A will have questions with short answers that will be entered into the computer in specified format. Credit will be given based only on the correctness of the final answer. Note that some of these questions may be designed to assess your ability to comprehend and complete mathematical reasoning and to give justification.
- Part B will have about 5 to 7 problems requiring written solutions which may be longer. For all the problems in this part, complete justification of all steps of your solution is required. Credit will be given based only on the correctness of your mathematical reasoning.
- The official syllabus is available at <https://www.cmi.ac.in/admissions/syllabus.php>. In addition, note that the emphasis will be on testing your ability to reason mathematically. Some questions may involve facts and/or concepts not explicitly covered in the syllabus, but sufficient information will be supplied in the question itself for you to be able to deduce the answer by reasoning.
